D135

EML  
(ETH/MVB)

ECL  
(ETH/CAN)

- ▶ Our new Fuji assembly line is now totally ramped up. With this new SMD line we doubled our pick and place capacity in comparison to last year.
- ▶ The expansion of our capacity was „just in time“ because our order intake was very strong in the last months. Thank you!
- ▶ In this year we will invest further in new technologies and new production equipment.

### Spotlights:

- ▶ Introduction of the new labeling system with 2-D barcode and type label.
- ▶ Demand for the „hybrid applications“ of the D135 is steadily growing.
- ▶ First deliveries of our D500 series (ETH to RS232, RS422, RS485) are planned soon.
